PROFESSIONAL EXPERIENCE (MOBILE APP)

KODIE

NOV 2023 - DEC 2024

Kodie is a cutting-edge mobile app developed to address the challenges faced by property owners, tenants, and contractors in managing rental properties efficiently. It is built on the premise of making property management more accessible, collaborative, and streamlined. Whether you are an individual property owner, a tenant seeking the perfect rental, or a contractor offering services, Kodie is designed to cater to your unique needs.

HRMS INFO

AUG 2023

Centralized data management: HRMS INFO allows for the storage and management of employee data from multiple companies in a single, centralized system.

Company profiles: Each company can have its own profile within the HRMS INFO, including information such as company name, address, contact details, and organizational structure.

Employee database: The HRMS INFO stores comprehensive employee information, including personal details, job roles, departmental assignments, and employment history.

TMS

AUG 2023

Tour creation: Employees can use the Tour Management System (TMS) to create new tours, specifying details such as destination, duration, purpose, and budget.

Itinerary planning: TMS facilitates the planning of tour itineraries, allowing employees to schedule activities, accommodations, transportation, and other logistics.

ADVISECUBE

APR - 2023

Diverse finance courses: The e-learning app offers a wide range of finance courses covering topics such as investment strategies, financial planning, accounting principles, risk management, and more.

Interactive quizzes: Users can engage with the material through interactive quizzes that reinforce learning and assess understanding of key concepts covered in the courses.

YOGA

JAN - 2023

Convenient access to yoga: Users can practice yoga from the comfort of their own home or any location of their choice. Flexible scheduling: Yoga apps allow users to practice at their own pace and fit sessions into their busy schedules.

E-ADMIN MANAGEMENT SYSTEM (WEBSITE)

DEC - 2024

Developed a comprehensive E-Admin Management System as part of the Ambit project, designed to streamline administrative processes across multiple modules. Key features include:

- Travel Management System: Integrated solutions for managing car and air travel bookings (similar to Ola and Uber).
- File Upload System: Enabled secure and efficient file uploads for administrative use.
- Customer Satisfaction Module: Designed forms and dashboards to gather and analyze customer feedback.
- Dynamic Form Builder: Built customizable forms to adapt to various administrative needs.
- Reverse Pickup System: Developed workflows to manage and track reverse logistics seamlessly.

AMBIT BUDGETING SYSTEM (WEBSITE)

DEC - 2024

Developed the Ambit Budgeting System, a robust financial management solution with Master and Budget modules to streamline budgeting and resource allocation processes. Key functionalities include:

- Master Module:
 - Added company details for centralized record-keeping.
 - Created and managed customer profiles and business entities.
 - Configured budget head masters for categorizing and tracking financial data.
- Budget Module:
 - Enabled comprehensive budget planning and monitoring tailored to specific business requirements.

COLORBLIND TEST APPLICATION (MOBILE APP)

JAN - 2025

Description: Developed a React Native application that helps users test for color blindness using Ishihara plates. The app dynamically presents images and evaluates user responses to determine potential color vision deficiencies

Technologies Used: React Native
